ANNEX

Mapping of AI-Use Policies in International Law Journals

Methodological note: *Research conducted between September and October 2026. Each journal's instructions for authors, ethical guidelines, and publication agreements were consulted directly at source; where no dedicated AI-use provision was found at journal level, the applicable publisher framework was verified on the publisher's own website. Policy URLs are provided in the rightmost column of each table and were last verified in October 2026.*

1. Supranational Standard-Setters

Body	Substance of AI Governance	Policy URL
COPE – Committee on Publication Ethics	AI tools may not be listed as authors, as they cannot assume responsibility for the work, declare conflicts of interest, or manage copyright and licences. Authors who use AI in writing must disclose, transparently (in a Methods or equivalent section), which tool was used and in what capacity. COPE is the reference framework to which virtually all scientific publishers defer.	https://publicationethics.org/cope-position-statements/ai-author
ICMJE (May 2023 recommendations)	Disclosure of AI-assisted technology use both in the cover letter and in the manuscript; prohibition on attributing authorship to chatbots, AI, or AI-assisted technologies; the author bears responsibility for the absence of plagiarism in both AI-generated text and images; reviewers must not upload manuscripts to platforms that do not guarantee confidentiality, and must disclose if and how AI was used during peer review.	https://www.icmje.org/recommendations/browse/roles-and-responsibilities/defining-the-role-of-authors-and-contributors.html
WAME – World Association of Medical Editors	Prohibition on chatbot authorship; transparency regarding use; the author is responsible for accuracy and absence of plagiarism in AI-generated content; editors are expected to equip themselves with detection tools.	https://wame.org/recommendations-on-chatgpt-and-chatbots-in-relation-to-medical-publications
STM – International Association of STM Publishers	AI-assisted copy-editing need not be disclosed; any use beyond that must be disclosed.	https://www.stm-assoc.org/2023_10_10_STM_AI_in_Research_Position_Statement.pdf
Bluebook, 22nd ed. (2025), Rule 18.3	Introduces citation rules for responses generated by AI tools – the first formal recognition, within the U.S. citation system, of AI output as a citable object – with the consequence that certain journals (EJIL, Stanford) have intervened expressly to exclude it from citability as a primary source.	https://www.legalbluebook.com/bluebook/v22/rules/rule-18-the-internet-electronic-media-and-other-nonprint-resources

2. Journals with Autonomous Policies

These are the only twenty journals in the world, within the surveyed sample, that have adopted an autonomous AI-use policy.

Journal	Publisher / Affiliation	Model	Analytical Substance of the Policy	Policy URL
European Journal of	OUP / EUI – NYU	Own analytical	PRINCIPLE – Generative AI may complement, nc human intelligence in scholarly production. SCOPE	https://www.ejil.org/submissions.php

International Law (EJIL)		policy (six sections)	proof-reading (Grammarly), reference management EndNote), plagiarism checking (Turnitin) and trans AI-assisted search engines fall outside scope for sea within it when their generated text flows into the co PERMISSIBILITY CRITERION – the author's int contribution must clearly prevail over that of the A impermissible for the author's contribution to be no absent; impermissible if the AI's contribution would authorship acknowledgement in human terms; perm disclosure, if the contribution would only require at data analysis, AI's contribution may be substantial v undermining the author's, but the disclosure thresh CONDITIONS – Declaration and specification of submission and at each revision; editors may reques information; AI may not be cited as a source. SANC Rejection or post-publication retraction. PERIODI editors commit to revising the policy frequently. PE – absolute prohibition on uploading the article, in w to any AI platform, even for suggestions, grounded of copyright and the author's original ideas.	
Modern Law Review (MLR)	Wiley / LSE	Two-tier disclosure with typed safe-harbour	Safe-harbour practices exempt from disclosure: translation of quoted passages (provided the method is described) and AI-assisted idea generation or exploratory research, provided no model output is incorporated in the manuscript and the resulting text is entirely the author's own. All other uses of AI or LLMs must be disclosed in a brief statement attached to the cover note or title page. Non-compliance may lead to rejection. Note: an internal tension exists – the author guidelines also contain a stricter formula stating that the journal does not accept submissions developed in whole or in part with AI assistance.	https://onlinelibrary.wiley.com/page/journal/14682230/homepage/author-guidelines
McGill Law Journal / Revue de droit de McGill	McGill University (student-run, peer reviewed)	Prohibition with typed exceptions, vetting procedures and reporting	RULE – Authors must draft the text substantially and entirely themselves, without generative text technologies. Use of AI to generate or substantially alter the body or footnotes constitutes unethical conduct and potential plagiarism, subject to investigation. PERMITTED USES – AI-assisted copy editing only, plus one additional specified exception. VETTING – Manual search for typical generative-text markers; AI detection software (ZeroGPT, Turnitin, AI Content Detector); consultation of faculty advisers. CONSEQUENCES – including reporting to the author's institution, bar association, funding body, or other regulatory authority. The only journal in the sample that regulates not only the rule but also verification and sanction.	https://lawjournal.mcgill.ca/about/submissions/
Georgetown Law Journal	Georgetown University	Contractual warranty in	The author warrants: (i) sole authorship; (ii) that the above-the-line text – text, diagrams, tables,	https://www.law.georgetown.edu/georgetow

		the publication agreement	footnote text, and parenthetical explanations – was not written with generative AI in a manner constituting plagiarism, including but not limited to copy-and-paste from generative AI; (iii) that where AI was used for research assistance, the content generated has been verified by a human researcher or author. The journal acknowledges that many modern legal research tools incorporate AI and recognises their necessity, but reserves the right to rescind the agreement if the work shows clear signs of unverified generative AI use, including hallucinated cases or citations. Spell check and grammar check are not considered generative AI; brainstorming with AI is not prohibited.	n-law-journal/submissions/
Yale Law Journal (from vol. 136)	Yale University	Disclosure with standalone hallucination warning	A brief disclosure of AI use is required, with the explicit clarification that disclosed use does not itself negatively affect editorial assessment. Original and not found elsewhere: an explicit warning on hallucinated sources – should the editorial committee become aware of these, it will weigh heavily on their evaluation.	https://ylj.yale.edu/submissions
Yale Journal of Law & Technology (YJoLT)	Yale University	Mandatory disclosure of use and non-use, with post-publication retraction power	Authors must declare whether or not AI was used in research and drafting. The declaration, to be attached to the submission, must state: (a) if and how AI was used in research; (b) if and how it was used in drafting or editing; (c) which AI tools were used. Use does not produce a negative effect on evaluation. The author remains fully responsible for content and must confirm the veracity of sources. The journal reserves the right to decline publication even after acceptance and to retract after publication if arguments prove to be products of fabricated or hallucinated sources, or if AI use was not correctly declared at submission.	https://yjolt.org/submissions
Yale Journal of Law & the Humanities (YJLH)	Yale University	Prohibition in principle with mandatory documentation and editorial discretion	Use of AI-based tools to contribute to generating an article's content – including LLMs, generative AI and chatbots – violates the journal's conception of authorship. Authors must nonetheless acknowledge and document any use of such tools. The final decision on admissibility rests with the editorial board. This is therefore not an absolute prohibition but a prohibition in principle, tempered by a documentation requirement and case-by-case evaluation.	https://digitalcommons.law.yale.edu/yjlh/policies.html
Stanford Law Review (vol. 79)	Stanford University	Significance-threshold disclosure, expressly	PREMISE – the journal takes an expressly permissive stance toward AI integration in scholarly production, aiming to mitigate specific risks. MANDATORY DISCLOSURE – at submission, any use of generative AI that	https://review.law.stanford.edu/submissions/

		permissive stance	significantly affected the substance, originality or reliability of the contribution must be declared; the author must exercise best judgement. Not expected for minor copy-editing, broad-ranging background research or source retrieval. Expected where AI was used, inter alia, to generate theses, arguments or counter-arguments, to draft large sections of the manuscript, or to conduct empirical analysis. In publication, significant use must be disclosed in an author's note. RESPONSIBILITY – the author is responsible for originality, accuracy and integrity of all content, including AI-assisted work, covering accuracy of statements and correct attribution of ideas to underlying sources. Citation of AI-generated material as a primary source is not permitted. SANCTION – AI-introduced errors are treated analogously to those introduced in other ways and assessed under the journal's Ethics Policy; hallucinated sources or misrepresentation of AI sources may constitute grounds for revocation of acceptance.	
University of Pennsylvania Law Review (from vol. 175)	University of Pennsylvania	Disclosure of any use	Obligation to disclose any use of AI in preparing the contribution. The cover letter must indicate which AI tools were used, how they assisted the research process, and how they assisted drafting or revision. The journal assures that disclosed use will not itself weigh against the contribution in evaluation.	https://www.pennlawreview.com/submissions/
Vanderbilt Law Review	Vanderbilt University	Granular disclosure with conduct obligations	The most granular policy among U.S. general law reviews. Authors must use AI responsibly, ethically and transparently; verify AI-generated claims; guard against AI-introduced biases; independently produce all substantive aspects of their work.	https://vanderbiltlawreview.org/submissions/
Harvard Journal of Law & Technology (JOLT)	Harvard University	Fully permissive disclosure	The most permissive model in the U.S. landscape. Authors may use generative AI at any stage of the writing process, provided every use is disclosed. The disclosure is to be placed in a footnote on the title page and must specify the tool used and its function – drafting, copy-editing, research, idea generation.	https://jolt.law.harvard.edu/submissions
Texas Law Review	University of Texas	Responsibility acknowledgement	Minimal formulation. Authors bear full responsibility for the content, sources and integrity of their contributions, including when using AI. No new disclosure obligations are created; the ordinary rules are restated.	https://texaslawreview.org/submissions/
Mitchell Hamline Law Review	Mitchell Hamline School of Law	Full prohibition	The journal does not accept submissions generated, in whole or in part, by artificial intelligence, and reserves the right to rescind	https://open.mitchellhamline.edu/mhlr/about.html

			publication of a contribution upon determining that it contains AI-generated content.	
Virginia Journal of International Law	University of Virginia	Prohibition / warranty	Prohibition clause or warranty against AI use. The clustering of prohibitive policies by institution (Virginia, Yale) suggests a role for university legal offices rather than individual editorial boards.	https://www.vjil.org/submissions
Journal of Law and Politics	University of Virginia	Prohibition / warranty	Prohibition clause or warranty against AI use.	https://jlp.law.virginia.edu/submissions
American Journal of International Law (AJIL)	CUP / American Society of International Law	CUP framework with autonomous addition	Adopts the full CUP framework (prohibition on AI authorship for lack of accountability; compliance with the plagiarism policy; disclosure of generative uses). Adds an autonomous obligation – the author must identify work generated, in whole or in part, by large language models or other AI tools. This obligation is placed alongside the plagiarism warning, signalling it as a matter of integrity, not merely transparency.	https://www.cambridge.org/core/journals/american-journal-of-international-law/information/instructions-contributors
Leiden Journal of International Law (LJIL)	CUP / Leiden University	CUP text reproduced and specified on page	AI does not satisfy the accountability requirements of authorship and may not be listed as author. Any use of AI-generated content must comply with the plagiarism policy and good citation practices. MUST ALWAYS BE DECLARED AND DESCRIBED: uses aimed at generating text or images – including translation of sources or of one's own work – or at analysing or extracting insights from data or other materials. DO NOT REQUIRE DISCLOSURE: minimal and non-generative uses in manuscript preparation – basic spell or language checking, insertion of single words or brief phrases, minor formatting tasks. The author's responsibility for use, including minimal and non-generative use, is retained, with an express invitation to verify the text for unintended consequences, particularly regarding citations.	https://www.cambridge.org/core/journals/leiden-journal-of-international-law/information/instructions-contributors
Asian Journal of International Law	CUP / National University of Singapore	CUP text reproduced on page	Identical to the LJIL framework – prohibition on authorship, disclosure of generative uses (text, images, translation of sources or own work, analysis or extraction of insights from data), exemption of minimal and non-generative uses, full author responsibility.	https://www.cambridge.org/core/journals/asian-journal-of-international-law/information/instructions-contributors
Texas A&M Journal of Property Law	Texas A&M University	Experimental model	The only journal in the sample to have published an entire volume AI-assisted and to have proposed a taxonomy articulated across five levels of use, in lieu of the binary distinction between permissible and impermissible.	https://law.tamu.edu/academics/journals/journal-of-property-law

SSRN (repository, not journal)	Elsevier	Elsevier framework applied to preprints	Relevant because it captures the near-totality of legal working papers. Authors may use AI only to improve readability and language of their own work, not to replace researcher tasks such as producing insights or theories, analysing and interpreting data, drawing conclusions, or presenting viewpoints. Use must occur under human supervision and control, with careful review and editing of output, since AI can produce authoritative-sounding but erroneous, incomplete or biased results.	https://www.elsevier.com/about/policies-and-standards/publishing-ethics/the-use-of-ai-and-ai-assisted-technologies-in-writing-for-elsevier

3. Publisher Frameworks

Publisher	Policy URL	Authorship	Author Disclosure Regime	Peer Review Regime
Cambridge University Press	https://www.cambridge.org/core/services/authors/open-access/ai	AI does not satisfy the requirements of authorship, given the need for accountability. AI and LLMs may not be listed as authors of any Cambridge publication.	AI use must be declared and clearly explained in publications, as required for any other software, tool or methodology. Use must not violate the plagiarism policy – the work must be the author's own and must not present others' ideas, data, words or material without adequate citation and transparent acknowledgment. The author is responsible for accuracy, integrity and originality. At journal level, generative uses must be declared and minimal non-generative uses are exempt.	No group-specific peer review policy identified; individual journal ethics guidelines and journal-specific policies apply.
Oxford University Press	https://academic.oup.com/pages/authoring/journals/preparing_your_manuscript/research-and-publishing-ethics	Aligned with COPE – AI may not be an author.	Guidelines on responsible, appropriate and transparent use of Gen AI by authors and editors. For books and reference works, an AI Use Declaration Form is required. For articles, the matter is referred to each journal's Instructions for Authors, with the result that the level of detail varies significantly across titles (see EJIL).	OUP has not issued a specific peer review policy, deferring to COPE guidelines. Individual journals may introduce their own prohibitions (EJIL).
Wiley	https://authorservices.wiley.com/author-resources/Journal-Authors/open-	Prohibition on AI authorship; AI may not replace human	Full disclosure at submission, specifying tools used, reasons for use and how outputs were verified. Authors are advised to	Prohibition on uploading the manuscript to AI platforms. AI may be

	access/author-compliance-tool/artificial-intelligence.html	expertise or authorship.	review tools' terms of use periodically. AI may not be used to generate, alter or fabricate data or results.	used solely for language editing of the review report, with disclosure obligation.
Elsevier	https://www.elsevier.com/about/policies-and-standards/publishing-ethics/the-use-of-ai-and-ai-assisted-technologies-in-writing-for-elsevier	Prohibition on AI authorship and on citing AI as author.	The policy applies solely to the writing process and does not cover research methodology, data analysis or experiments. AI is permitted only to improve readability and language, not to replace researcher tasks – producing insights or theories, analysing and interpreting data, drawing conclusions, presenting viewpoints. Human supervision and output review required. Disclosure in a dedicated section before references, to be published in the work. Express prohibition on AI-generated or AI-altered images, except where this forms part of the research design.	The most stringent peer review regime in the landscape. Absolute prohibition on generative AI involvement in any stage of the review process or editorial decision, including auxiliary tasks such as linguistic improvement of the report, on grounds of confidentiality and integrity.
Springer Nature	https://www.springernature.com/gp/policies/editorial-policies/responsible-use-of-ai-tools	Prohibition on authorship – LLM services cannot be held responsible for the purposes of authorship attribution.	LLM use must be adequately documented in the Methods section or, failing that, in another appropriate section. AI-assisted copy editing – improvements to human-generated text for readability, style and error correction – does not require disclosure. Prohibition on generative AI for the production of images and video, on grounds of copyright and research integrity. Non-generative machine learning uses to manipulate or enhance images must be noted in the caption, for case-by-case evaluation.	Prohibition on uploading manuscripts to generative AI tools, on grounds of confidentiality and expertise; obligation to disclose if and how AI supported the evaluation.
Taylor & Francis (incl. Routledge and Hart)	https://authorservices.taylorandfrancis.com/research-integrity/ai-and-publishing/	Use of AI tools to generate article content is incompatible with the criteria of authorship.	Express acknowledgment, within the article or volume, of any use of generative AI tools, via a statement naming the tool with version number, how it was used and the reason. Articles require a specific statement of AI usage disclosure. For volumes, the	Editors and reviewers must not upload files, images or information from unpublished manuscripts to generative AI tools, on penalty of violation of the rights-holder's intellectual property.

			author must notify editorial contacts of the intention to use AI, ideally at proposal stage, and if authorised must include the statement in a preface or introduction.	Reviewers are expressly prohibited from generating the review report with AI.
SAGE	https://us.sagepub.com/en-us/nam/publishing-policies-for-journals#AI	Prohibition on AI authorship.	Fundamental distinction between assistive AI – tools that improve the author's own prose – exempt from disclosure, and generative AI – creation of new content – which must be declared, cited and included in references. Authors using generative AI must make every effort to ensure that output is factually correct and that references reflect the claims made.	Prohibition on uploading manuscripts to AI tools; governance of AI use in review.
MDPI, Emerald, De Gruyter, IOP	https://www.mdpi.com/editorial_process	Alignment with COPE position statement – prohibition on authorship.	Any use of AI tools for creating, developing or generating the publication must be clearly and transparently reported by authors in the Methods section and Acknowledgements, or in another appropriate section, describing the content created or modified and citing the tool's name and version. Retention of earlier drafts and prompts used is encouraged.	Confidentiality framework per COPE.
Kluwer Law International, Brill Nijhoff, Sweet & Maxwell, Mohr Siebeck, Dalloz	*Not publicly accessible*	–	NO PUBLICLY ACCESSIBLE POLICY IDENTIFIED. These publishers publish the majority of continental European and non-university common law legal scholarship – Common Market Law Review, European Business Law Review, Nordic Journal of International Law, Law Quarterly Review, Public Law, Rabels Zeitschrift, JuristenZeitung, Archiv des öffentlichen Rechts, Recueil Dalloz. This lacuna is, systematically, the most significant finding of the entire survey.	–

4. Journals Subject to the Cambridge University Press Framework

Journal	Field	Applicable Rule	Policy URL
German Law Journal	Comparative, European and International Law (open access)	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/german-law-journal/information/instructions-contributors
European Law Open	European Law (open access)	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/european-law-open/information/instructions-contributors
International & Comparative Law Quarterly (ICLQ)	International and Comparative Law – BIICL	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/international-and-comparative-law-quarterly/information/instructions-contributors
Cambridge Law Journal	General	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/cambridge-law-journal/information/instructions-contributors
Legal Studies	General – Society of Legal Scholars	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/legal-studies/information/instructions-contributors
European Journal of Risk Regulation	Risk Regulation	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/european-journal-of-risk-regulation/information/instructions-contributors

European Constitutional Law Review	European Constitutional Law	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/european-constitutional-law-review/information/instructions-contributors
Israel Law Review	General	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/israel-law-review/information/instructions-contributors
Transnational Environmental Law	Environmental Law	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/transnational-environmental-law/information/instructions-contributors
Global Constitutionalism	Global Constitutionalism	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/global-constitutionalism/information/instructions-contributors
International Journal of Law in Context	Law and Social Sciences	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/international-journal-of-law-in-context/information/instructions-contributors
Business and Human Rights Journal	Business and Human Rights	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/business-and-human-rights-journal/information/instructions-contributors
Canadian Journal of Law & Jurisprudence	Legal Philosophy and Theory	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/canadian-journal-of-law-and-jurisprudence/information/instructions-contributors

Journal of Law and Religion	Law and Religion	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/journal-of-law-and-religion/information/instructions-contributors
Journal of African Law	African Law – SOAS	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/journal-of-african-law/information/instructions-contributors
Cambridge Yearbook of European Legal Studies	European Law	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/cambridge-yearbook-of-european-legal-studies/information/instructions-contributors
Law & Society Review	Sociology of Law	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/law-and-society-review/information/instructions-contributors
Journal of Law and Courts	Law and Political Science	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/journal-of-law-and-courts/information/instructions-contributors
Legal Information Management	Legal Documentation	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/legal-information-management/information/instructions-contributors
Netherlands Yearbook of International Law	International Law	CUP framework – prohibition on AI authorship for lack of accountability; declaration and explanation of generative uses; compliance with plagiarism policy; author responsibility for accuracy, integrity and originality; exemption of minimal and non-generative uses.	https://www.cambridge.org/core/journals/netherlands-yearbook-of-international-law/information/instructions-contributors

5. Journals Subject to the Oxford University Press Framework

Journal	Field	Applicable Rule	Policy URL
International Journal of Constitutional Law (I·CON)	Comparative Constitutional Law – NYU	No dedicated section verified. General reference to COPE and OUP ethics policies.	https://academic.oup.com/icon/pages/General_Instructions
Oxford Journal of Legal Studies (OJLS)	Legal Theory and General – Oxford	No dedicated section verified.	https://academic.oup.com/ojls/pages/General_Instructions
Chinese Journal of International Law	International Law – Chinese Society of Int. Law	No dedicated section verified.	https://academic.oup.com/chinesejil/pages/General_Instructions
Journal of International Criminal Justice	International Criminal Law	OUP framework.	https://academic.oup.com/jicj/pages/general_instructions
International Journal of Law and Information Technology	Law and Technology	OUP framework.	https://academic.oup.com/ijlit/pages/General_Instructions
International Data Privacy Law	Data Protection	OUP framework.	https://academic.oup.com/idpl/pages/General_Instructions
Journal of International Economic Law	International Economic Law	OUP framework.	https://academic.oup.com/jiel/pages/General_Instructions
Journal of Legal Analysis	Economic Analysis of Law – Harvard	OUP framework.	https://academic.oup.com/jla/pages/General_Instructions
Statute Law Review	Legislative Drafting	OUP framework.	https://academic.oup.com/slr/pages/General_Instructions
Human Rights Law Review	Human Rights	OUP framework.	https://academic.oup.com/hrlr/pages/General_Instructions
International Journal of Refugee Law	Refugee Law	OUP framework.	https://academic.oup.com/ijrl/pages/General_Instructions
Journal of Environmental Law	Environmental Law	OUP framework.	https://academic.oup.com/jel/pages/General_Instructions
ICSID Review – Foreign Investment Law Journal	Investment Arbitration	OUP framework.	https://academic.oup.com/icsidreview/pages/General_Instructions
Journal of Law and the Biosciences	Biolaw	OUP framework.	https://academic.oup.com/jlb/pages/General_Instructions

7. Journals with No Identifiable Policy

This is the most significant section from a systemic standpoint. It includes the entirety of non-university continental European legal scholarship, the major U.S. and Australian flagship reviews, and – paradoxically – some of the most authoritative journals specialising in technology law.

Journal	Publisher / Affiliation	Note
Common Market Law Review	Kluwer Law International	No AI rule at journal or publisher level. A first-rank lacuna – this is the flagship journal of EU law.
European Business Law Review	Kluwer Law International	Idem.
Nordic Journal of International Law	Brill Nijhoff	No identifiable Brill AI policy.
Journal of the History of International Law	Brill Nijhoff	Idem.
European Journal of Health Law	Brill Nijhoff	Idem.
The Journal of World Investment & Trade	Brill Nijhoff	Idem.
International Organizations Law Review	Brill Nijhoff	Idem.
Journal of International Humanitarian Legal Studies	Brill Nijhoff	Idem.
Law Quarterly Review	Sweet & Maxwell	No public AI policy. Sweet & Maxwell publishes no AI author guidelines.
Public Law	Sweet & Maxwell	Idem.
Criminal Law Review	Sweet & Maxwell	Idem.
Rabels Zeitschrift für ausländisches und internationales Privatrecht	Mohr Siebeck	No identifiable policy. The entire high-profile German-language area is unregulated.
JuristenZeitung	Mohr Siebeck	Idem.
Archiv des öffentlichen Rechts	Mohr Siebeck	Idem.
ZaöRV / Heidelberg Journal of International Law	Max-Planck-Institut	Idem.
Revue internationale de droit comparé	Société de législation comparée	No identifiable policy. The Francophone area is unregulated.
Revue trimestrielle de droit civil	Dalloz	Idem.
Revista Española de Derecho Constitucional	CEPC	No identifiable policy. The Spanish-language area is unregulated.
JIPITEC	DGRI (open access)	Paradox – a leading journal on intellectual property and technology law, which publishes the European Copyright Society's opinions on generative AI, has no rules for its own authors.
SCRIPTed	University of Edinburgh (open access)	No identifiable policy.
Utrecht Law Review	Utrecht University (open access)	No identifiable policy.
Erasmus Law Review	Erasmus University (open access)	No identifiable policy.

European Journal of Legal Studies	European University Institute (open access)	No identifiable policy.
Melbourne University Law Review	Melbourne Law School	The Publication Policy authors must sign contains no AI clauses.
Sydney Law Review	University of Sydney	No identifiable policy.
University of Toronto Law Journal	University of Toronto Press	No identifiable policy.
Harvard Law Review	Harvard University	Absence verified. The journal regulates only, in traditional terms, the obligation to quote for non-trivial reuse of another's language and to cite paraphrases, including of one's own prior work.
Columbia Law Review	Columbia University	No identifiable policy.
Michigan Law Review	University of Michigan	No identifiable policy.
Virginia Law Review	University of Virginia	No identifiable policy – notwithstanding two specialised journals from the same institution that carry a warranty.
California Law Review	UC Berkeley	No identifiable policy.
New York University Law Review	NYU	No identifiable policy.
Cornell Law Review	Cornell University	No identifiable policy.
Duke Law Journal	Duke University	No identifiable policy.
University of Chicago Law Review	University of Chicago	No identifiable policy.
Northwestern University Law Review	Northwestern University	No identifiable policy.
UCLA Law Review	UCLA	No identifiable policy.
Notre Dame Law Review	Notre Dame	No identifiable policy.
Minnesota Law Review	University of Minnesota	No identifiable policy.
Fordham Law Review	Fordham University	No identifiable policy.
William & Mary Law Review	William & Mary	No identifiable policy.
Emory Law Journal	Emory University	No identifiable policy.
Washington & Lee Law Review	Washington & Lee	No identifiable policy.
Boston University Law Review	Boston University	No identifiable policy.
Berkeley Technology Law Journal	UC Berkeley	Mirror paradox of JIPITEC – a leading technology law journal, extensively publishing on generative AI, with no rules for its own authors.
Stanford Technology Law Review	Stanford University	No identifiable policy.
Duke Law & Technology Review	Duke University	No identifiable policy.
Harvard International Law Journal	Harvard University	No identifiable policy.

Yale Journal of International Law	Yale University	No identifiable policy.
Columbia Journal of Transnational Law	Columbia University	No identifiable policy.
Michigan Journal of International Law	University of Michigan	No identifiable policy.
Chicago Journal of International Law	University of Chicago	No identifiable policy.
The Journal of Legal Studies	University of Chicago Press	No identifiable policy.
The Journal of Law and Economics	University of Chicago Press	No identifiable policy.
Jurimetrics	American Bar Association / ASU	No identifiable policy.
Journal of Legal Education	AALS	No identifiable policy.

8. Summary

Regulatory Model	N.	Journals
Prohibition with vetting procedures and reporting to professional bodies	1	McGill Law Journal
Full prohibition	1	Mitchell Hamline Law Review
Prohibition in principle with mandatory documentation and editorial discretion	1	Yale Journal of Law & the Humanities
Contractual warranty in the publication agreement	3	Georgetown Law Journal, Virginia Journal of International Law, Journal of Law and Politics
Disclosure of any use	2	EJIL, University of Pennsylvania Law Review
Disclosure of use and non-use, with post-publication retraction power	1	Yale Journal of Law & Technology
Disclosure with typed safe harbour	1	Modern Law Review
Significance-threshold disclosure	1	Stanford Law Review
Disclosure with obligation to identify AI-generated output	1	American Journal of International Law
Simple disclosure	2	Yale Law Journal, Vanderbilt Law Review
Fully permissive disclosure	1	Harvard Journal of Law & Technology
Publisher text reproduced and specified on page	2	Leiden Journal of International Law, Asian Journal of International Law
Responsibility acknowledgement	1	Texas Law Review

Experimental model with graduated taxonomy	1	Texas A&M Journal of Property Law
Rule derived wholly from publisher	~92	CUP, OUP, Wiley, Elsevier, Springer, Taylor & Francis, SAGE, MDPI journals
No identifiable policy	~56	Kluwer, Brill, Sweet & Maxwell, Mohr Siebeck, Francophone and Spanish-language area, Dutch open-access journals, U.S. and Australian flagships, technology law journals
